Tutorial - 3

- 0^*1 not accept 00
 $(0+1)^*$ accept 00
- $(i) (0^*1)^* = (0+1)^*$ ✗
 $(ii) (0+1)^* 01 (0+1)^* + 1^* 0^* \neq (0+1)^*$ ✗

Not sure about this explanation

$$\begin{aligned}
 LHS &= (0+1)^* 01 (0+1)^* + 1^* 0^* \\
 &= (0+1)^* (0+1)^* + 1^* 0^* \\
 &= (0+1)^* + 1^* 0^* \\
 &= (0+1)^*
 \end{aligned}$$

LHS \neq RHS

But answer is (i) ~~True~~ false
(ii) false

Q2 Lang. $(a + b(b+aa)^*ab)^*$

| state | $\delta(q, a)$ | $\delta(q, b)$ |
|-------|----------------|----------------|
| q_0 | q_0 | q_1 |
| q_1 | q_2 | q_1 |
| q_2 | q_1 | q_0 |

final state ? = q_0 , Ans q_0 only

- ✓ q_0 because null string should be possible
- ✗ q_1 if we make q_1 final then string b will be accepted. which is not part of given language
- ✗ q_2 if we make q_2 final then "ba" will be accepted which is not part of L

3 $(a+tb)^* a (a+tb)^* b (a+tb)^*$ given in question

eliminating

X B in option (B) I can't start from symbol B.

X C in option (C) string aa possible but in our question aa is not possible

in option (D) string ba possible but in our question ba is not possible

Answer (A) $(a+tb)^* ab (a+tb)^*$ ✓

[Direct bi pata chul gate 😊]

initial state

4
01 X
20 ✓
101 X
110 ✓

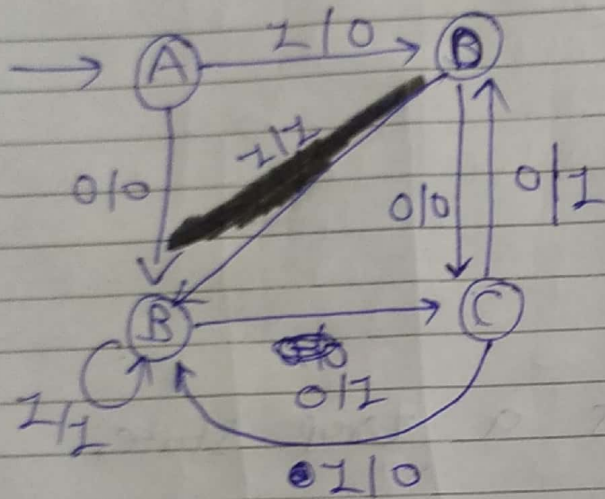

~~all state possible as~~
initial state

⇒ for 01 and 101 it will ^{always} goto state B

⇒ for 10 and 110 it will goto final state C.

shortest string 20 Any

④ Method 1 :-
Mealy machine

| if initial state | Shortest path to C |
|------------------|--------------------|
| A | 10 or 00 |
| B | 0 |
| C | 10 or 100 |
| D | 0 |

So, answer B.

④ Method 2

if initial state is, then final state

| strings | A | B | C | D |
|---------|---|---|---|---|
| 01 | B | B | B | B |
| 10 | C | C | C | C |
| 101 | B | B | B | B |
| 110 | C | C | C | C |

5 initial q_0
final q_1

I have take
 q_1 as q_1 and
 q_2 as q_2 .

→ Here, q_2 is a trap state.

So, only possible answer is $\{a^n b, n \geq 0\}$

✓

2 All binary string divisible by 5

DFA Transition Table

| current state | 0 | 1 |
|----------------|----------------|----------------|
| q ₀ | q ₀ | q ₁ |
| q ₁ | q ₂ | q ₃ |
| q ₂ | q ₄ | q ₀ |
| q ₃ | q ₁ | q ₂ |
| q ₄ | q ₃ | q ₄ |

Watch Youtube Video. of

Asha Khilrani

for this kind of question

Possible string
To verify
Answer

| | 16 | 8 | 4 | 2 | 1 |
|----|----|---|---|---|---|
| 0 | | | | | 0 |
| 5 | | | 1 | 0 | 1 |
| 10 | | 1 | 0 | 1 | 0 |
| 15 | | 1 | 1 | 1 | 1 |
| 20 | 1 | 0 | 1 | 0 | 0 |
| 25 | 1 | 1 | 0 | 0 | 1 |
